Urdan Metal & Casting
Industries Ltd.

In the rapidly changing conditions of the modern battlefield maneuverability plays a crucial role. The modern tanks are taking the action farther and faster to terrains not accessible previously and thus creating the necessity to find ways of bringing supplies to the fighting forces without jeopardizing the logistics units.

BACKTRAIL is a direct response to this challenge providing the forces with continuous supplies, while maintaining their ability to switch positions quickly and efficiently.

The versatility offered by the unique design of the BACKTRAIL makes it the ideal solution for the logistics requirements of the modern battlefield.

BACKTRAIL - 8 Tonnes Heavy Duty Trailer

Technical highlights of the BACKTRAIL:

- 8 Tonnes of various payloads - Fuel, Ammunition, Water, Communication equipment, etc.
- Polyurethane filled tires fitted on caster wheels
- Large (2x4meters) platform with twist lock
- The BACKTRAIL was developed for the IDF
- The BACKTRAIL was approved by the IDF after intensive tests in the Golan heights.
